

Great Sandhills Railway

General Tariff – GSR 1600-4 Carbon Emissions Surcharge

Effective April 15, 2024

Item 100 – Carbon Emissions Surcharge

The Government of Canada has passed the Greenhouse Gas Pollution Pricing Act which includes a carbon tax on fuels that emit greenhouse gases when consumed. The tax will be phased in over three years beginning on April 1, 2019, and increase each subsequent year.

On April 1, 2024, the Government of Canada increased the carbon tax resulting in an increase to the GSR's Carbon Emissions Surcharge. The mileage-based carbon emission surcharge will increase to **\$0.26 per mile** effective April 15, 2024. This charge will be included on the freight invoice to be paid by the payer of freight and will apply to all loaded shipments travelling on GSR lines.
